

Questão 9 — Balanço energético com força externa ($k = 1.0$, $\alpha = 0.5$, $b = 0.3$, $F_0 = 0.5$)

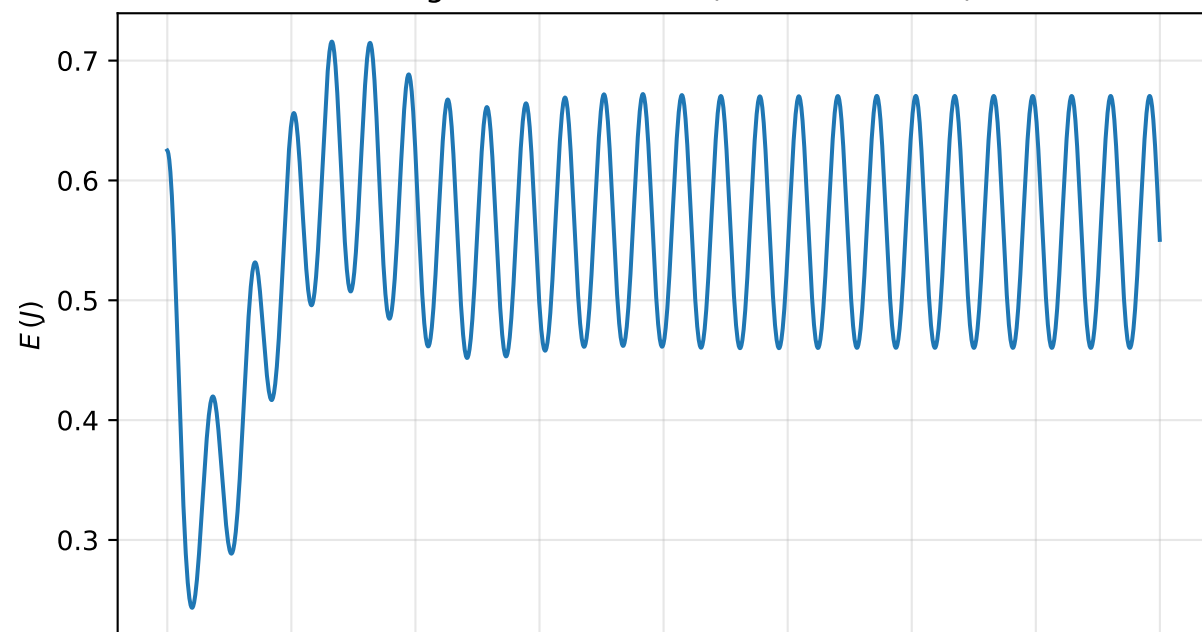

Energia — $\omega = 0.5$ rad/s (abaixo da ressonância)

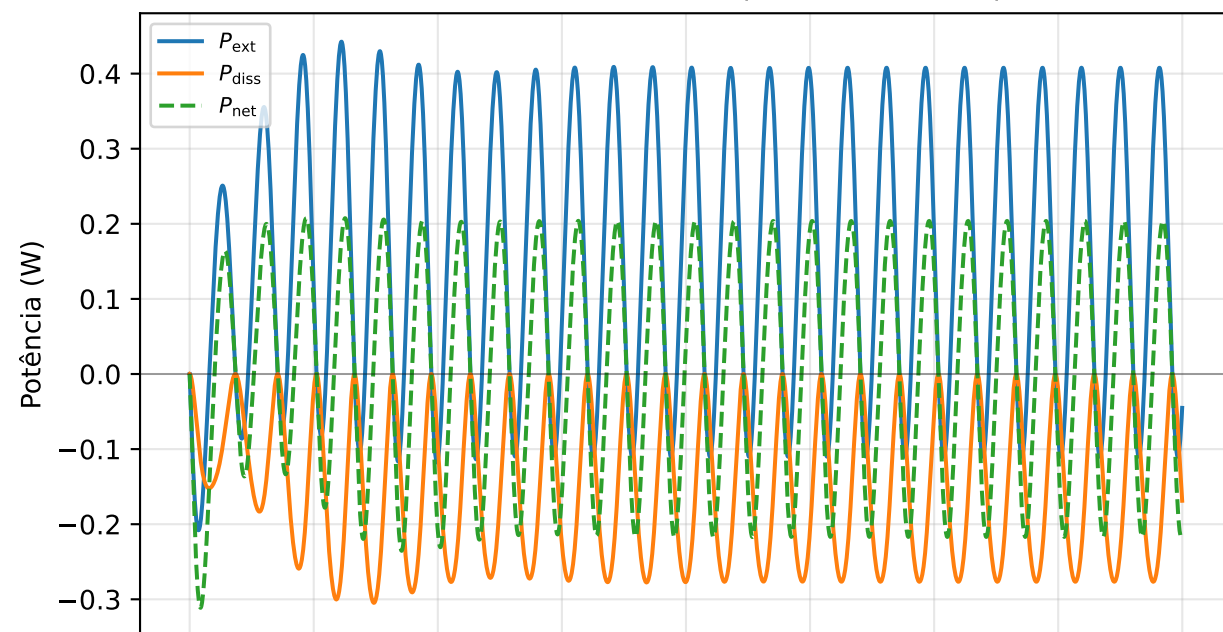

Potência — $\omega = 0.5$ rad/s (abaixo da ressonância)

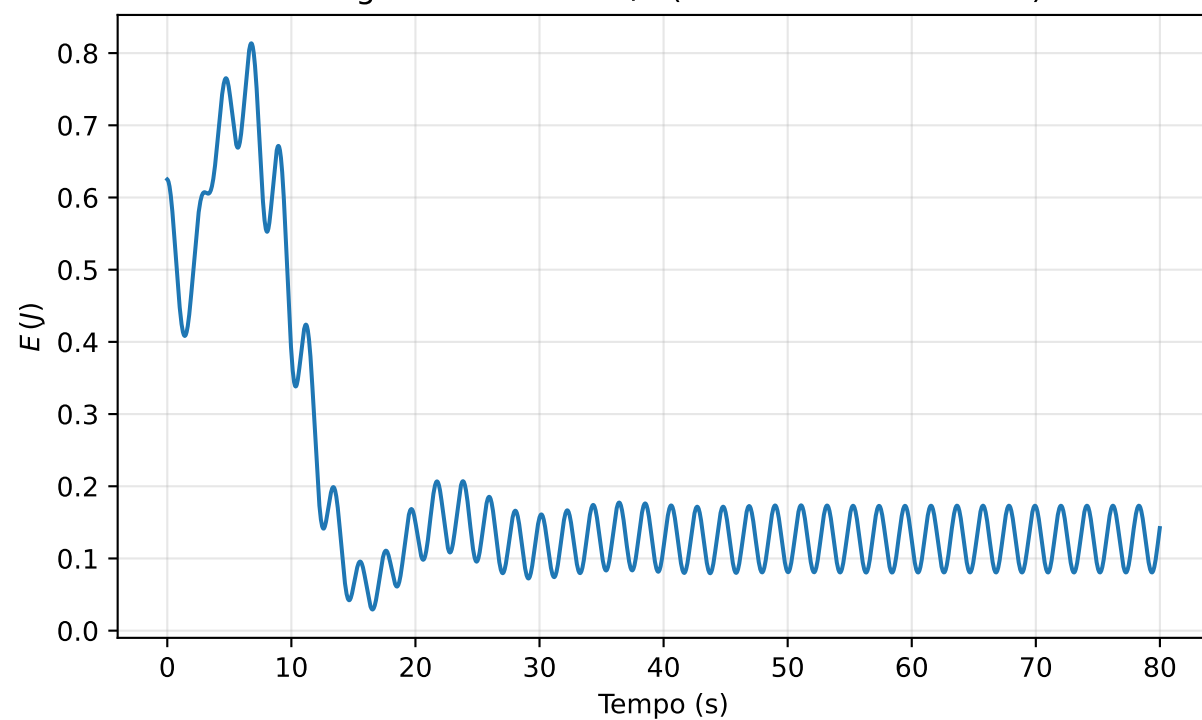

Energia — $\omega = 1$ rad/s (na ressonância)

Potência — $\omega = 1$ rad/s (na ressonância)

Energia — $\omega = 1.5$ rad/s (acima da ressonância)

Potência — $\omega = 1.5$ rad/s (acima da ressonância)
